MASTERS AND USA SWIMMING  
KERSHAW PARK  
CANANDAIGUA, NEW YORK

## USMS 2 mile National Championship Open Water swim at Canandaigua Lake, NY, July 11, 2009

**Course:** North to south swim, ½ mile out and back two times.

**Water Conditions:** 75°F, 2-3 foot head-on chop during southern swim legs, 2-3 foot swells pushing north both created by 22 mph southern wind. Conditions were challenging but it was always safe to swim and there were ample safety water craft lining the course.

**Air Conditions:** 70F, partly cloudy, windy.

**Number of Competitors:** 143

**Background:** Approximately 40 minutes into the race start, lightning was sighted in the area, resulting in the safety/lifeguard patrol at the event to order all competitors exit the water. At this point, several competitors (36) had completed or nearly completed the course; their shortest way to exit the water was straight ahead to the finish line. Most of these competitors had no knowledge that any safety call had been made. All other competitors safely exited the water under their own power at various stages of the course distance but not complete distance; they were alerted to turn around by the on-water safety patrol.

**The situation:** What ruling is to be made about timing, award placing, All-American status, and All-Star points? I had several factors instantly to consider:

- The effort expended in participating in this race: it was challenging to swim into the chop.
- Anyone starting this race deserved a prize since it took a lot of energy to swim to deal with this chop and waves.
- Due to the effort already expended by all participants, regardless of how far they got, the safety factor of this event would be in jeopardy, especially for the lesser-ability and older swimmers would not be able to repeat the race so a “redo” was out of the question.
- People had airplanes to make since this event attracted participants from all over the USA.
- For those swimmers who completed the full distance, it would not be fair to ask them to swim the event over.
- How would USMS fairly award All-American status and All Star points to participants based on their complete or partial finish of the course?

As the USMS Chair of OWLDC, the decision I made was; for those participants who completed the full 2-mile course, they would receive their earned age group award and All-Star points. The first place finisher who completed the full 2-mile course in their age group would receive All-American status in their age group. All competitors who did not finish the full course would be deemed as “tied” with their like age group competitors and all would receive the award placing two down from those who completed the full course. Example one, in the M40-44, five men finished the course, placing 1 through 5. All M40-44 who did not complete the course would tie for seventh place and would receive (xx-2) points. Example two, in the W40-44, two women finished the course, placing 1 through 2, the seven other swimmers in that age group were forced to cut the swim short and thus we awarded a tie for 4th place and would receive (xx-2) points. Example three, If there was no finisher in an age group, all participants in that age group would receive “tied” 2nd place awards and the respective All-Star points, (xx-2). This allowed those “full course” competitors to receive their rightly earned awards but also allowed those who did not finish the course due to circumstances beyond their control to be commended for their efforts expended because everyone in the water during this race used up a considerable amount of energy.

The race directors then took the manual finish record created as a backup to the electronic timing, and determined the award placing and times for those who completed the race. Medals and All-American were awarded as earned and given to the competitors at the awards ceremony. Participants who did not complete the course will receive their awards in the mail. There were some disappointments for not being able to complete the course but the mitigating factor was that all participants received recognition of their effort.

Marcia Cleveland  
USMS Open Water Long Distance Chair
